

Shift Pattern Reference Guide

Basic Patterns

1. Standard Day Shift (Mon-Fri)

Time:	06:00–14:00
Monday	■■■■
Tuesday	■■■■
Wednesday	■■■■
Thursday	■■■■
Friday	■■■■
Saturday	
Sunday	

2. Basic Morning/Afternoon Split

	Morning Team	Afternoon Team
Time:	06:00–14:00	14:00–22:00
Mon:	■■■■	■■■■
Tue:	■■■■	■■■■
Wed:	■■■■	■■■■
Thu:	■■■■	■■■■
Fri:	■■■■	■■■■

3. Weekend-Only Pattern

Time:	07:00–19:00
Monday	
Tuesday	
Wednesday	
Thursday	
Friday	
Saturday	■■■■
Sunday	■■■■

4. Fixed Night Shift

Time:	22:00-06:00
Monday	██████████
Tuesday	██████████
Wednesday	██████████
Thursday	██████████
Friday	██████████
Saturday	
Sunday	

5. Three Fixed Shifts (24/7 Coverage)

	Morning	Afternoon	Night
Time:	06-14	14-22	22-06
Team A:			
Team B:			
Team C:			

6. Part-Time Pattern (Half Days)

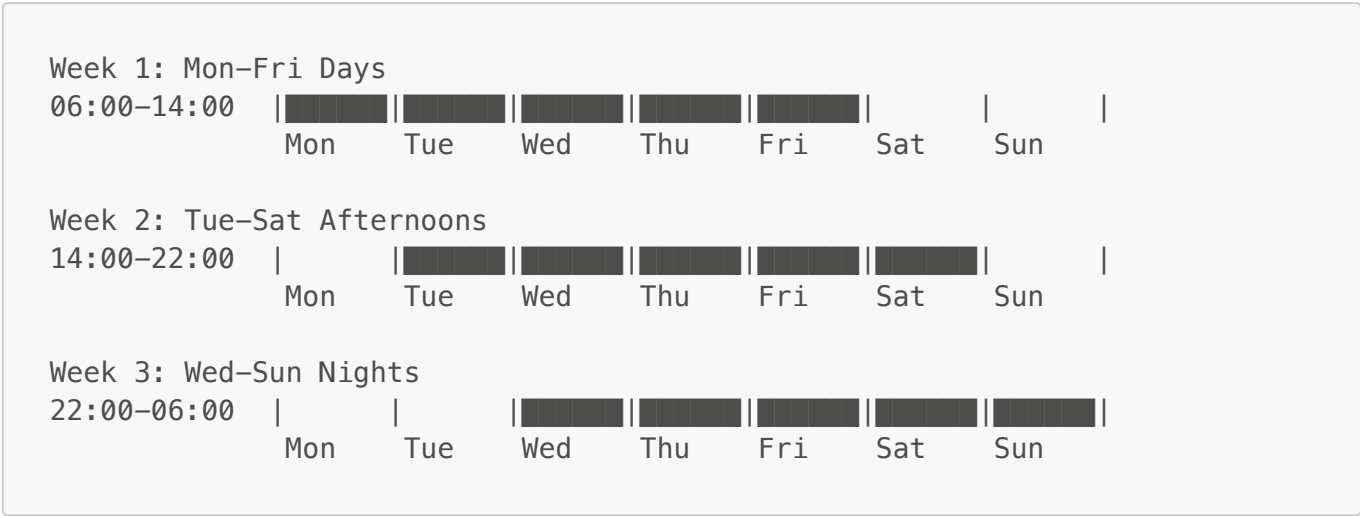

Time:	09:00-13:00
Monday	████████
Tuesday	████████
Wednesday	████████
Thursday	████████
Friday	████████

7. Fixed Weekday/Weekend Teams

Weekday Team:	Mon	Tue	Wed	Thu	Fri	Sat	Sun
	■	■	■	■	■		
Weekend Team:	Mon	Tue	Wed	Thu	Fri	Sat	Sun
						■	■

Advanced Patterns

1. Week-based Patterns (3 week cycle)

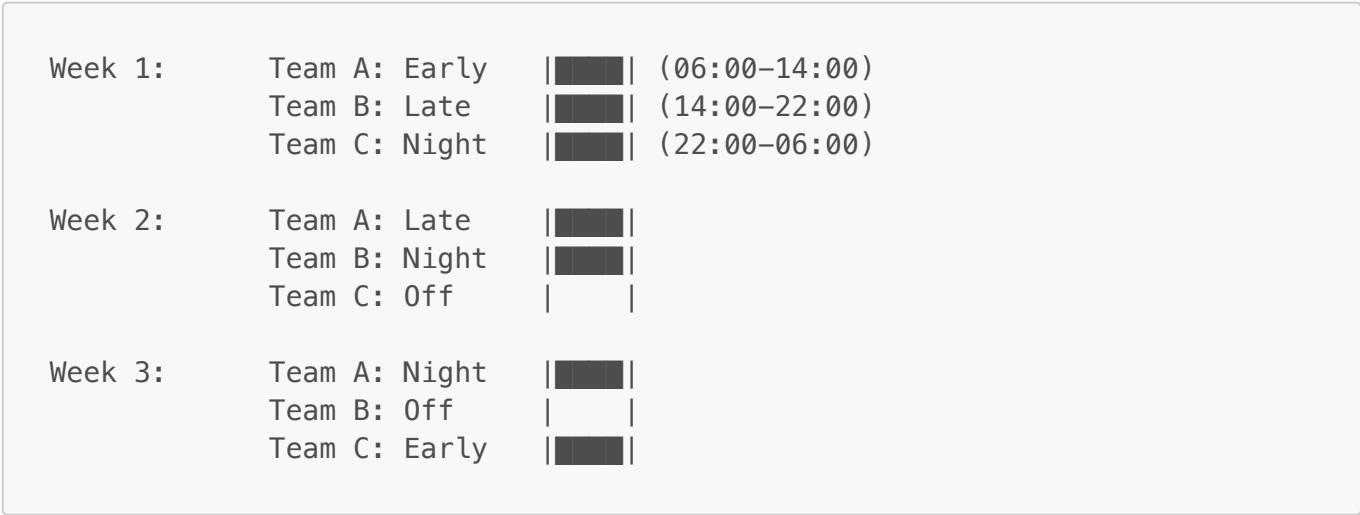

2. 4-on-4-off Pattern

3. Split Shifts

4. Panel/Continental Shifts (3 teams rotating)

5. Alternating Day/Night Pattern

Week 1: |Day Shift|Day Shift|Day Shift|Day Shift|Day Shift|

06:00–14:00

Week 2: |Night |Night |Night |Night |Night |

22:00–06:00

6. Panama Schedule (2-2-4)

Sun Mon Tue Wed Thu Fri Sat

|--|--|--|--|--|--|

W1: |DD|DD|NN|NN| | | | D = Day Shift

W2: | | | | |DD|DD|NN| N = Night Shift

W3: |NN| | | | | | | Blank = Off

Rather than trying to create one complex pattern, you create two simpler patterns:

1. Day Pattern (07:00-19:00)

2. Night Pattern (19:00-07:00)

The complexity comes from:

Setting the Cycle ID to link both patterns to the same 8-day rotation cycle Using Cycle Day Offset to indicate when in the cycle each pattern is active Setting different Cycle Start Dates for each worker when assigning them.

So in this case:

- The day pattern has Cycle Day Offset = 0 (starts at beginning of cycle)
- The night pattern has Cycle Day Offset = 2 (starts on day 3 of cycle)

Then when assigning workers, you set different Cycle Start Dates to stagger them:

- Worker 1: Cycle Start Date = Jan 1
- Worker 2: Cycle Start Date = Jan 3
- Worker 3: Cycle Start Date = Jan 5
- Worker 4: Cycle Start Date = Jan 7

The system uses these offsets to automatically work out when each worker should be doing each type of shift or having days off. It's much simpler than trying to create one complex pattern that handles everything. The system is designed to combine simple patterns in clever ways rather than making individual patterns too complex.

Notes:

- All patterns can be customized for specific start/end times
- Patterns can be adjusted for holidays and special events
- Coverage requirements can be set for each shift
- Temporary covers and leave can be accommodated
- Rest days are automatically calculated
